

Knowledge Organiser – Year 4 – Geography – Spring Term – All Around the World

What do I already know?

- I can name and locate the world's seven continents and five oceans

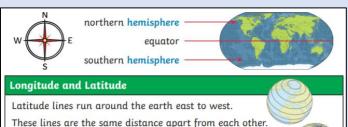

- I understand which parts of the world are hot or cold

- I can name some of the world's countries and locate them on a map or globe

What should I be able to do at the end of the topic?

- Name some of the countries on the Equator.
- Tell you more about one country.
- Compare daylight hours in the UK and polar regions.
- Identify a location on a map when the latitude and longitude are provided.
- Identify similarities between the UK and the tropics.
- Describe the climate in the tropics.
- Tell you more about one country on the Prime Meridian.
- Explain why day and night occur.

Key Vocabulary				
co-ordinates	A set of numbers and/or letters that show you a specific position on a map. A half of the earth, usually divided by the equator into the northern and southern hemisphere .			
hemisphere				
observatory	A place for observing and studying natural events on Earth or in space.			
polar	The area around the North or South Pole			
precipitation	Water particles that reach the ground including rain, hail and snow.			

```
Longitude lines run over the top of the earth north to south.
```

These lines are not equally distant from each other.

These lines are used to give the specific location of anywhere in the world using **co-ordinates**.

Tropie of Cancer Equator Tropie of Capricorn	 The Tropics The Tropic of Cancer (northern tropic) and the Tropic of Capricorn (southern tropic) mark the northerly and southerly positions that the sun can be overhead. Between the tropics the weather is hot all year round. Rainfall can vary here. In some places, there is very little rain, some areas have a rainy s and some places have lots of rain all year round. 			
opical Rainforest	Tropical Coniferous Rainforest	Tropical Dry Forest	Tropical Grasslands (Savannahs)	
South America, Africa and Southeast Asia Constantly warm No dry season Average 60mm rain per month	 North & Central America and Asia Steady temperatures all year round Low precipitation 	 Mexico, Brazil, Southeast Asia and India Warm all year round Long dry seasons 	 Africa, Asia, India and Australia Hot Dry season lasts up to 9 months 900mm – 1500mm rain per year 	
No.				

Time Zones

- The Prime Meridian (PM) line divides the earth into the eastern and western hemisphere.
- It passes though the Royal Observatory in Greenwich, England.
- All time zones start here Greenwich Mean Time (GMT).
- There are 24 different time zones one for each hour in the day.
- From GMT to the east = +1 hour for every time zone.
- Prime Meridian
- From GMT to the west = -1 hour for every time zone.
- The International Date Line is on the opposite side of the world from the PM. When it is noon at the Prime Meridian, it is midnight along the International Date Line. This is where midnight occurs first across the globe.
